**Product code numbers in brackets*

The gas grill on the above appliances are designed to be used with the grill door fully open. It has come to our attention that IF THE GRILL DOOR IS CLOSED WITH THE GRILL BURNER LIT, DANGEROUS LEVELS OF CARBON MONOXIDE CAN BE PRODUCED.

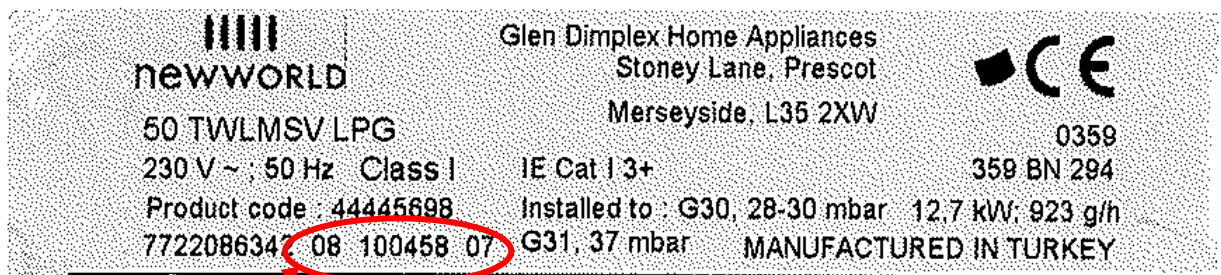

N.B. The above products are perfectly safe to use if they are operated in accordance with the manufacturers instructions.

We will shortly be contacting customers who have bought one of the above products to arrange for an engineer to carry out a small modification to the grill door, which will prevent such toxic fumes being created should the grill door be closed, in error, when the grill burner is in use.

In the meantime;
DO NOT, UNDER ANY CIRCUMSTANCES, OPERATE THE GRILL UNLESS THE GRILL DOOR IS FULLY OPEN.

Safety Inspection

If you own any of the New World products (all serial numbers) or Belling products with serial numbers beginning with 07 or 08, please contact **FREEPHONE 0800 294 3128** so that we can arrange for one of our engineers to carry out a safety inspection and carry out any modifications required. The serial number can be found on the data plate at the bottom front edge of the appliance.

Serial Number
