

## Versatile Home Energy Solution

Thousands of homes throughout the UK & Ireland have already been transformed by choosing Flogas as their gas supplier. Whether for heating, hot water, cooking, gas fires or tumble drying, Flogas can provide tailored clean, efficient and controllable energy solutions straight to your door, no matter where you live.

### Home Heating

Combining the most modern home heat technology with a range of modern, compact, quiet and efficient gas boilers, you can rest assured that Flogas can provide piping hot water and controllable central heating whatever the size of your home.

Furthermore, with a modern condensing boiler your home will use significantly less gas than with a conventional boiler, benefiting both your pocket and the environment. Designed to extract the maximum amount of heat possible from both the input combustion products and exhaust gases, condensing boilers are available in a range of styles and sizes with control systems to boot, offering you the greatest flexibility in home heating design.

### Home Cooking

It's no secret that professional cooks prefer gas and no wonder – it's clean, fast and controllable, helping you to achieve great results every time.

### Gas Fires

When the central heating's not on, or you wish to supplement it, a gas fire provides instant heat at the flick of a switch. You can have it all – the warmth and cosiness of a real flame fire without the hassle of fetching fuel or clearing ashes.

### Tumble Drying

You can even have a gas tumble dryer in your home, achieving results every bit as good as any electric dryer.

## Gas Storage Solutions

LP gas can be stored neatly adjacent to your home in either a bulk gas tank (similar to an oil tank) or in cylinder form, both options providing you with an uninterrupted energy supply.

A bulk tank provides the storage capacity for homes to use Flogas not only for heating but also for hot water, cooking, gas fires and tumble dryers. Should your property be unable to accommodate a bulk storage tank (or you simply require less gas, for example, for cooking or gas fires only), neat propane cylinders provide the ideal solution.

Whatever the solution, you can rest assured that screening options are available to maintain the aesthetics of your home and garden. It may also be helpful to know that evergreen shrubs and trees can be used to provide tank screening, so long as they are located at least one metre from the tank.

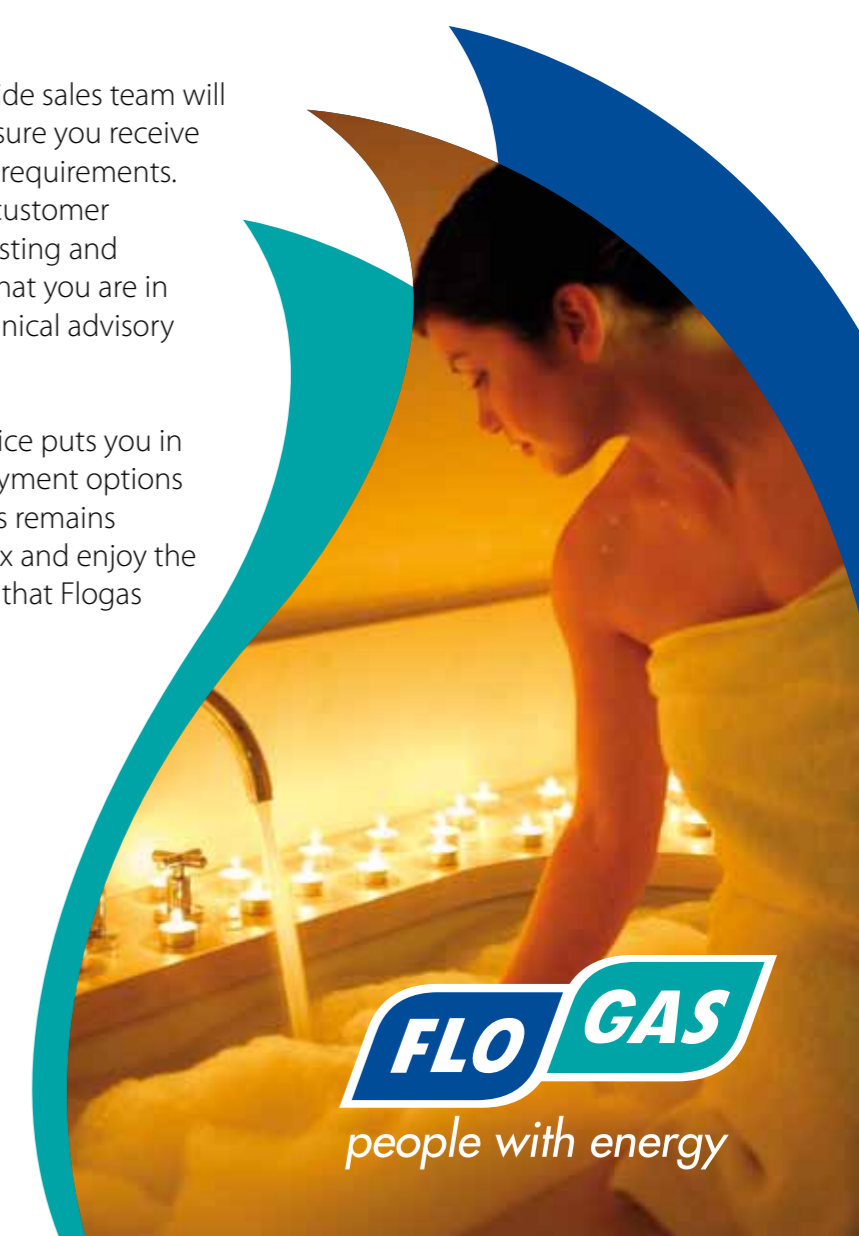

## Customer Service

A member of our technically trained nationwide sales team will visit your home before installing Flogas to ensure you receive the optimum solution dependent upon your requirements. Dedicated to providing the highest levels of customer service throughout the design, installation, testing and commissioning stages, you can rest assured that you are in safe hands with our free, comprehensive technical advisory service.

Furthermore, our unparalleled after sales service puts you in control. With a range of ordering facilities, payment options and a nationwide distribution network, Flogas remains responsive to your needs allowing you to relax and enjoy the benefits of warmth, reassurance and comfort that Flogas can bring you and your family.

## Switching to Flogas

If you are already an existing user of LPG, did you know that you can now switch suppliers without the hassle of having to switch you tank? Its now even easier to enjoy the benefits of being a Flogas customer so why not call us on 028 9073 2611 for further information or visit [www.flogasni.com/switch](http://www.flogasni.com/switch)
